Patents:

Alan W, Jason Erickson, and Doug Dropeskey,2005 U.S. Patent Number: 6,892,210 Database management and synchronization across a peer-to-peer network May 10, 2005

Joe J. Hanzek 2005, U.S. Patent Number: 6,980,963 online system and method of status inquiry and tracking related to orders for consumer product having specific configurations December 27, 2005

Kenneth E. Flick, 2003U.S. Patent Number: 6,628,196 Vehicle control system with piggyback controller and associated methods 30/9/ 2003

Karl-Erbo G. Kageneck, 2000, U.S. Patent Number RE36,727 Method of indexing and retrieval of electronically-stored documents June 6, 2000

Lawrence W. Krebs, Edwin J. Zakrzewski, 2002 U.S. Patent Number: 6,370,544 System and method for integrating enterprise management application with network management operations April 9, 2002
